

Economic Policy Frameworks Revisited

The legacy of Giancarlo Marini

Rome, March 18th 2024

School of Economics – University of Rome Tor Vergata

Sala del Consiglio, Building B, II Floor

This event is dedicated to the memory of Giancarlo Marini, who passed away prematurely in 2013 while serving as the Director of the Department of Economics in Tor Vergata. After graduating from the University of Rome La Sapienza, Giancarlo Marini completed a PhD in Economics at the London School of Economics under the supervision initially of Janet Yellen and then —after she moved to Berkeley with her husband George Akerlof— of Willem Buiter. His dissertation was awarded the 1985 Sayer's Prize of the Royal Economic Society as the best macroeconomic PhD thesis in the UK. After a Leverhulme Fellowship at the University of Bristol, he returned to the London School of Economics as a full-time member of the Faculty to teach Advanced Macroeconomic Theory. Giancarlo Marini then decided to return to Italy, where he taught at the universities of Bari and Siena before finally settling at the University of Rome Tor Vergata. Here he was in charge of the teaching of macroeconomics, set up and directed the PhD in International Economics, and served as the Head of the Department of Economics from 2007 until his sudden death.

Giancarlo Marini's intellectual curiosity led him to be unsatisfied with the prevailing consensus in the profession and to investigate novel areas of research and propose highly original and unconventional solutions to well-known problems. He had a profound influence on his colleagues and on generations of young researchers. He was acutely aware of the social aspects of economics and of the close links across different areas of the discipline, which often tend to be overlooked in the current age of hyper-specialism.

A number of colleagues and students of Giancarlo Marini contributed a volume on Economic Policy Revisited: A Restatement of the Evergreen Instruments, edited by Cesare Imbriani and Pasquale Scaramozzino, recently published by Springer Nature. This publication brings together articles on a number of topics on the theory and practice of economic policy, which often build on his original and innovative ideas.

PROGRAMME

9.45 – 10:20 **Welcome address**

Lucia Leonelli, University of Rome Tor Vergata
